EXAMINER

TANNER, HARRY B

ART UNIT PAPER NUMBER

3744

DATE MAILED: 04/25/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/727,599	Applicant(s) CARTER, DAVID	
	Examiner Harry B. Tanner	Art Unit 3744	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

| 3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____ | 6) <input type="checkbox"/> Other: ____ |

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 6-7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Beatenbough. Beatenbough discloses sensing ambient temperature and humidity in order to turn the electric heater of a refrigerator on and off in response to detected dew point to prevent condensation and frost on the door of the refrigerator.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 11-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beatenbough in view of Hochheiser. Beatenbough is applied as in the rejection of claim 1 above. Hochheiser teaches the use of a surface temperature sensor 70 in order to determine when the surface temperature of a refrigerator is within a given differential to the dew point of the ambient air (see col. 4, lines 58-68). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Beatenbough such that it included the use of a surface temperature sensor in order to provide a more accurate determination of when the surface temperature of the refrigerator is within a given differential to the dew point of the ambient air in view of the teachings of Hochheiser.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beatenbough as applied to claim 1 above, and further in view of Official Notice.

Beatenbough does not show door latches for doors 10. Official Notice it taken that door latches including door latch assemblies and door latch assembly covers are well known in the refrigeration art. Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Beatenbough such that it included the use of door latch assemblies and door latch assembly covers. The location of the temperature and humidity sensors in the door latch assembly is considered to have an obvious matter of engineering design since the operation of the heater control would not be substantially altered with the sensor moved to that location.

Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beatenbough as applied to claim 1 above, and further in view of Ibrahim. Ibrahim teaches the use of heat from refrigerant gas controlled by an electromechanical valve 84 in order to prevent condensation on the refrigeration system cabinets. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of such that it included the use of heat from refrigerant gas controlled by an electromechanical valve in order to prevent condensation in view of the teachings of Ibrahim.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harry B. Tanner whose telephone number is (571) 272-

Art Unit: 3744

4813. The examiner can normally be reached 8:30 am to 6:00 pm Monday, Tuesday, Wednesday and Friday and 2:00 pm to 6:00 pm Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Denise Esquivel, can be reached on (571) 272-4808. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://portal.uspto.gov/external/portal/pair>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
